Elasti Prints® Application Instructions

- For application on cotton, polyester or poly/cotton blends.
- An extra transfer is provided for testing purposes
- Before applying, check your transfers for spelling, color placement, etc.

1. Set Your Heat Press

   If not a Hotronix® heat press, add 10°
   **Temperature:** 300°F
   **Time:** 15 Seconds
   **Pressure:** Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel

   - Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press

   - Place the transfer image side down on the apparel
   - Close machine and press for 15 seconds

4. Peel Transfer Carrier Cold

   - Open machine and allow the print to cool completely to the touch.
   - Peel off the paper backing in a smooth, even motion.

Tips:
- Do not use a pillow
- With normal application, no cover sheet is needed.
  A cover sheet could possibly block heat from reaching the application.
- For 100% polyester only, this product can also be applied at 275°F for 15 seconds, peeling cold.
