CAD-PRINTZ® Express Matte 250 Application Instructions

• For application on cotton, polyester or poly/cotton blends.
• An extra transfer is provided for testing purposes
• Before applying, check your transfers for spelling, color placement, etc.

1. Set Your Heat Press
   If not a Hotronix® heat press, add 10°
   **Temperature:** 250°F
   **Time:** 5 Seconds
   **Pressure:** Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel
   • Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press
   • Remove the backing paper. You should be left with the transfer on a clear plastic carrier. Position on the apparel - you should be able to see the transfer as it will appear on the apparel.
   • Close machine and press for 5 seconds

4. Peel Hot
   • Open machine
   • Peel off the clear plastic carrier quickly in a smooth even motion.

Tips:
• Do not use a pillow
• With normal application, no cover sheet is needed. A cover sheet could possibly block heat from reaching the application.
