

Glow-in-the-Dark Application Instructions

- For application on cotton, polyester or poly/cotton blends.
- An extra transfer is provided for testing purposes
- Before applying, check your transfers for spelling, color placement, etc.

1. Set Your Heat Press

If not a Hotronix® heat press, add 10°

Temperature: 340°F

Time: 10 Seconds

Pressure: Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel

- Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press

- Place the transfer image side down on the apparel
- Close machine and press for 10 seconds

4. Peel Transfer Carrier Warm

- Open machine, wait 3-5 seconds, and peel off the paper backing in a smooth, even motion.

Tips:

- Do not use a pillow
- With normal application, no cover sheet is needed.
A cover sheet could possibly block heat from reaching the application.

Storage and Shelf Life of Your Transfers

Store your transfers in a cool dry place out of extreme hot or cold temperatures or moisture. Keeping them in a sealed bag will prolong the life of the transfers.
