Puff Application Instructions

For application on cotton, polyester or poly/cotton blends.
An extra transfer is provided for testing purposes
Before applying, check your transfers for spelling, color placement, etc.

1. Set Your Heat Press
   If not a Hotronix® heat press, add 10°
   Temperature: 360° - 370°F
   Time: 5 Seconds
   Pressure: Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel
   • Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press
   • Place the transfer image side down on the apparel
   • Close machine and press for 5 seconds

4. Peel Transfer Carrier Hot
   • Open machine and peel off the paper backing in a smooth, even motion.

Tips:
• Thread your garment on heat press to apply Puff (apply to a single layer).
• Remove Quick Slip Pad Protector from your press before pressing Puff.
• Do not use a pillow
• With normal application, no cover sheet is needed.
  A cover sheet could possibly block heat from reaching the application.
