Rhinestones Application Instructions

- For application on cotton, polyester or poly/cotton blends.
- Before applying, check your transfers for spelling, color placement, etc.

1. Set Your Heat Press
   If not a Hotronix® heat press, add 10°
   **Temperature:** 325°F
   **Time:** 10-12 Seconds
   **Pressure:** Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel
   - Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press
   - Remove the transfer backing. You should be left with the rhinestones on a clear plastic carrier. Position on the apparel - you should be able to see the transfer as it will appear on the apparel.
   - Close machine and press for 10-12 seconds

4. Peel Cold
   - Open machine and remove the garment from the press.
   - Allow the transfer to cool completely to the touch.
   - Peel off the clear plastic carrier in a smooth even motion.

Tips:
- Do not use a pillow
- With normal application, no cover sheet is needed.
  A cover sheet could possibly block heat from reaching the application.
