CAD-PRINTZ® Sub Block Application Instructions

- For application on cotton, polyester, poly/cotton blends, nylon, & spandex/Lycra®
- An extra transfer is provided for testing purposes
- Before applying, check your transfers for spelling, color placement, etc.
- Sub Block does not stretch.

1. Set Your Heat Press
   - If not a Hotronix® heat press, add 10°
   - **Temperature:** 265°F
   - **Time:** 20 Seconds
   - **Pressure:** Med/Firm 6-8 (60-80psi)

2. Preheat Your Apparel
   - Place apparel on platen and press for 3-5 seconds

3. Position Your Transfer & Press
   - Remove the backing paper. You should be left with the transfer on a clear plastic carrier. Position on the apparel - you should be able to see the transfer as it will appear on the apparel.
   - Close machine and press for 20 seconds

4. Peel Warm
   - Open machine and wait 3-5 seconds.
   - Peel off the clear plastic carrier quickly in a smooth even motion.

Tips:
- Do not use a pillow
- With normal application, no cover sheet is needed.
  A cover sheet could possibly block heat from reaching the application.
