

NEW AquaTru™ Water-Based Transfers

Available with Dye-Block™

Decorate the most dye saturated, sublimated uniforms and garments with confidence. When ordering, add Dye-Block as another color.

Turn Down the Heat

AquaTru™ with Dye-Block™ applies as low as 280 degrees, so decorating spandex, Lycra®, or other heat sensitive fabrics can be decorated without scorching. Ruined garments are a thing of the past.

Softness that Stretches

Once heat applied, AquaTru is soft and lightweight with excellent stretch and rebound, a perfect choice for performance wear and other stretchy garments.

Large 12"x19" Sheet Size

Print large images or gang more on a sheet than ever before!
