

Gang Sheet Images Chart

How many images will fit on a gang sheet?

Use the chart below to figure how many of your images will fit on a gang sheet. Find the height and width - the intersection on the chart tells you how many will be on each sheet. If between two dimensions, round up to the next highest. Then just let us know how many sheets you will need. For example, if you need 100 - 3" x 3" images, the chart shows we can fit 12 images on a sheet. If you needed 9 sheets, you should order at the price break of 10.

For more precise measurements use our gang calculator online at TransferExpress.com.
